

1 H. CLAIMS

2 What is claimed is:

3
4 1. An apparatus comprising:

5
6 a spray gun body attached to a handle and having a nozzle for spraying fluids; and

7
8 a trigger having a first end pivotally and operationally attached to the gun body and having at
9 least two grasping positions.

10
11 2. The apparatus of claim 1; wherein the handle includes at least two hand supports.

12
13 3. The apparatus of claim 1, further comprising a bend between a first grasping position and a
14 second grasping position of the trigger.

15
16 4. The apparatus of claim 1, further comprising a paint source attached to the gun body.

17
18 5. The apparatus of claim 1, further comprising a compressed air source attached to the gun body.

19
20 6. The apparatus of claim 4, further comprising a first control valve operably attached to the paint
21 source and to the trigger.

22
23 7. The apparatus of claim 5, further comprising a second control valve operably connected to the
24 compressed air source and to the trigger.

25
26 8. A method comprising the steps of:

27
28 grasping a trigger at a first position with a hand and squeezing the trigger towards a spray
29 gun handle to spray fluid from a spray gun; and

30
31 moving the hand to a second position of the spray gun trigger,

32
33 where the distance reached by a fluid spray from the spray gun increases.

- 1
- 2 9. A method of claim 8, wherein the fluid is paint.
- 3
- 4 10. A method of claim 8, wherein the second position of the trigger is proximately close to the spray
- 5 gun handle when the spray gun is operated from the first position of the trigger.
- 6
